

## ABOUT MANNA

Manna Hydration is the brainchild of two brothers who were tired of the bizarre and chunky looking bottles and tumblers they saw being sold. They wanted to create a line of tumblers that people enjoyed to carry and kept drinks temperature stabilized.

Our company is based in New York City, where we find constant inspiration in the hustle of passionate people going about their lives. We are also inspired by the foreign travels of our founders and staff and time spent in nature.

At Manna, we pride ourselves in only using the highest quality materials. We extensively test all of our products internally to ensure each and every bottle has a long lasting life.

We are constantly innovating by integrating mixed material and technologies into our hydration products. Bringing our great products to the next level and never ceasing to innovate is what we are all about. We scrutinize every detail and engineer our bottles to be a staple of our everyday lives and adventures.

We make products we love for people who love the world.  
We are Manna.
