

## ASSEMBLY INSTRUCTIONS

**FRAME:** Framework pieces are linked together by interior elastic cables. Unfold the framework and insert narrow ends of loose pipes into corresponding frame pipes. Stand chair frame upright (image 1).

**SEAT:** 1. Insert a chair frame pipe into each corner sleeve to help loosen the corner sleeves for assembly.  
2. Put the top corner sleeves of the seatback (seat back has the large mesh area) onto the tall frame pieces (image 2). 3. Put the corner sleeves of the seat bottom onto the shorter front frame pieces (image 3)

When assembling for the first time, you can press the iron tubes moderately for a better fit. Be careful not to pinch your fingers. Recommended max weight 299lbs.
