Case Study

Trident7 Marine

Trident 7 Marine Dealership division was hosting their annual sales meeting. During this event, all sales managers from every dealership would be receiving their sales targets for the upcoming year. The theme around the meeting was “Heating Up Sales.” The Pelican PL1001 Traveler Mug was chosen as it has extreme heat retention properties and is the perfect outdoor item. The delivery of the sales numbers utilized Logomark packaging. Since our decoration process is digital, variable data is available. Each Traveler Mug had the individual sales manager’s names on the box and their specific annual sales goal. An additional order of 1500 units was placed for Trident 7 Marine tradeshow giveaways and an additional order of 1500 units was placed for distribution to the dealerships every three months.

Case Study

The Orange County Rattlers Baseball Team wanted to present each of their vendors, customers and team members with a unique holiday gift thanking them for a successful year in the league. The gift had to be of a high perceived value, decorated subtly and most importantly, shipped in a custom box with the name of the recipient printed as part of the design.

The customer selected the GC6011 Water Resistant Wireless Speaker from the Ring Series, exclusive to Logomark. An existing Logomark holiday template was modified to accommodate the variable data field and the 300 boxes and speakers were printed in house and shipped to the customer from the facility in California. The box featured a QR code that, when scanned, redirected the user’s browser to an animated holiday greeting card from the team owners.

The response to the gift was outstanding with all 300 recipients viewing the digital greeting card. Advertising sales increased and the feedback from recipients was excellent.

The letters 'CE' signifies that products sold in the European Economic Area (EEA) have been assessed to meet high safety, health, and environmental protection requirements. Businesses know that products bearing the CE marking can be traded in the EEA without restrictions, while consumers enjoy the same level of health, safety, and environmental protection throughout the entire EEA.

PRODUCTION ART

Requirements & Guidelines

Use [MyLogomark's Upload Artwork](http://www.logomark.com) feature at www.logomark.com to submit your art files online or send via email to art@logomark.com.

Print Method

ACCEPTABLE FILE FORMATS

Vector files must be saved in *.ai, *.eps, or *.pdf formats with all text outlined. Bitmap files must be saved at a minimum of 600dpi and at 100% of final output size. Laser and deboss artwork must have halftones and gradients removed prior to submission.

UNSUPPORTED FILE FORMATS

QuarkXpress, Pagemaker and InDesign files are not accepted as artwork. Additional charges will apply to convert into a usable format. Microsoft Office files (Microsoft Word and PowerPoint) are not acceptable forms of artwork.

PERSONALIZATION LISTS

Personalization lists must be submitted in .txt, .xls, or .doc formats.

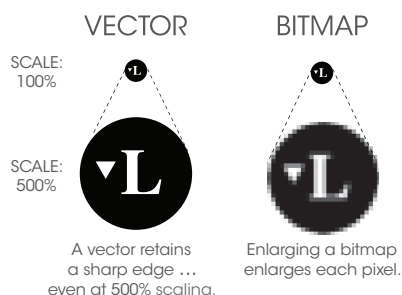

EMAIL ART ONLY TO: art@logomark.com

No correspondence will be provided at this address.

Client artwork will be kept on file for a period of 12 months.

Vector vs. Bitmap

Vector based artwork is resolution independent and can be scaled to any size without loss of detail. Bitmaps are comprised of pixels that enlarge when the image is enlarged. The larger a bitmap gets, the more the pixels will be visible.

Resolution

Resolution refers to the amount of pixels in a particular image and is generally measured in (d)ots (p)er (i)inch. High resolution files 600 dpi and a minimum of 100% final output size are preferable.

Gradients

Gradients cannot be reproduced on any laser engraved product. Limited gradients can be printed subject to art approval. Full color and gradient imprinting is available on all vinyl and full color transfer products.

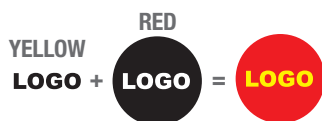

B/W vs. Color

Black and white line art or separated color art is required. Multi-color bitmaps are not acceptable as they cannot be traced into the separated colors.
